- Identify key standards, processes and procedures to support the policy
- Define security architectures that encapsulate the policy and support the delivery of secure IT services

### 1.2. Document Purpose

appropriate levels of confidentiality. This information sets out the key principles and main ‘do’s and don’ts’ that everyone should follow to achieve this for both electronic and paper records.

The common law duty of confidentiality requires that information that has been provided in confidence may be disclosed only for the purposes that the subject has been informed about and has consented to, unless there is a statutory or court order requirement to do otherwise.

This term describes personal information about identified or identifiable individuals, which should be kept private or secret. The definition includes dead as well as living people and 'confidential' includes information 'given in confidence' and 'that which is owed a duty of confidence'. The term is used in the Caldicott 2 Review: Information: to share or not to share (published March 2013).</p>
<p><b>Commercially confidential Information</b></p>	<p>Business/Commercial information, including that subject to statutory or regulatory obligations, which may be damaging to SCW CSU or a commercial partner if improperly accessed or shared.
